

ACME Virtual Servers

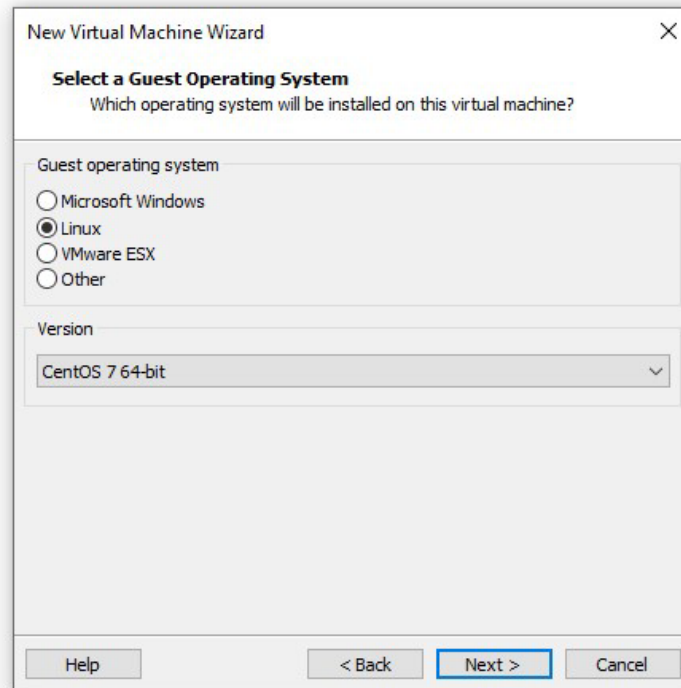

Virtual Server setup using VMWare

Create a new virtual machine using typical settings

Install OS system later

The first distro is CentOS 7 64bit

The second distro is Ubuntu 64bit

New Virtual Machine Wizard

Name the Virtual Machine

What name would you like to use for this virtual machine?

Virtual machine name:

CentOS 7 64-bit ACME Server

Location:

C:\Users\David\Documents\Virtual Machines\CentOS 7 64-bit ACME Server

Browse...

The default location can be changed at Edit > Preferences.

New Virtual Machine Wizard

Specify Disk Capacity

How large do you want this disk to be?

The virtual machine's hard disk is stored as one or more files on the host computer's physical disk. These file(s) start small and become larger as you add applications, files, and data to your virtual machine.

Maximum disk size (GB):

Recommended size for CentOS 7 64-bit: 20 GB

☐ Store virtual disk as a single file

☒ Split virtual disk into multiple files

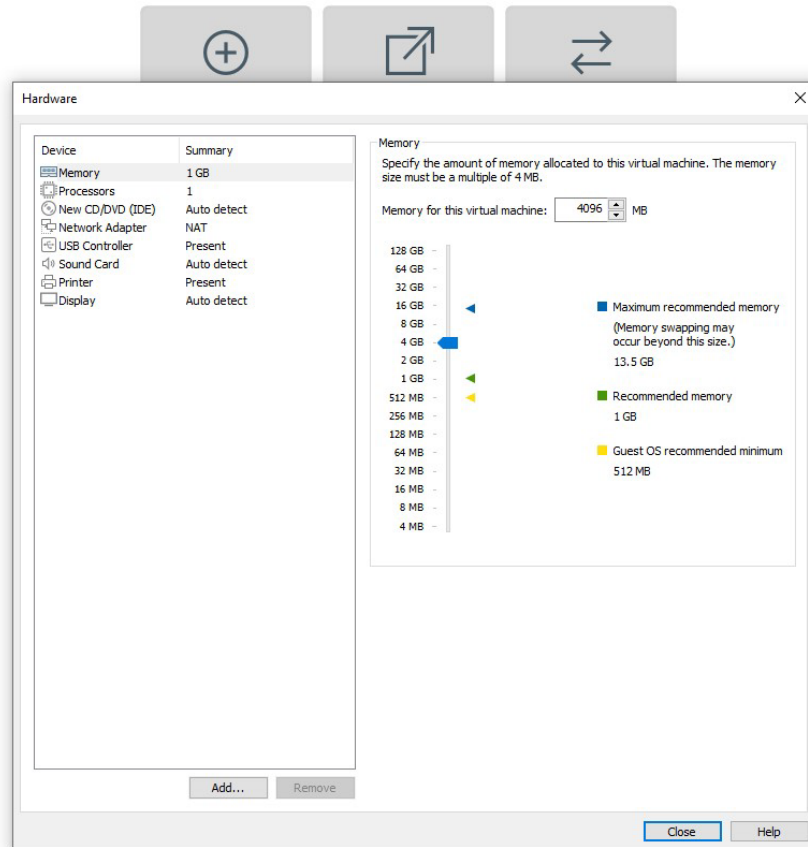

Splitting the disk makes it easier to move the virtual machine to another computer but may reduce performance with very large disks.
