

# The Awk Family

**Current Date:** 2021-03-23

David Belmont

ACME CORP

---

## Awk Overview

Awk is a UNIX programming language used for manipulating data and generating reports . Nawk is a newer version of awk , and gawk is the GNU version used on Linux.

The data may come from standard input, one or more files, or as output from a process. Awk can be used at the command line for simple operations, or it can be written into programs for larger applications. Because awk can manipulate data, it is an indispensable tool used in shell scripts and for managing small databases.

Awk scans a file (or input) line by line, from the first to the last line, searching for lines that match a specified pattern and performing selected actions ( enclosed in curly braces) on those lines. If there is a pattern with no specific action, all lines that match the pattern are displayed; if there is an action with no pattern, all input lines specified by the action are executed upon.

## Objectives

This tutorial will teach you how to write awk commands that will be used on your Linux server. Before getting started, make sure you know the filename and where it is in the Linux directory.

 cd /directory/file

## Table of Contents

### TABLE OF CONTENTS

- Awk Overview 
- Objectives 
- Table of Contents 
- 1: Print all the First Names. 
- 2: Print phone numbers for Tom and Frodo after their names. 
- 3: Print Peregrin's full name and phone number area code only. 
- 4: Print all phone numbers in the 123 area code along with the names 

- 5: Print all Last names beginning with either a T or D. ✓
  - 6: Print all first names containing four or less characters. ✓
  - 7: Print the first names and area codes of all those in the 916 area code. ✓
  - 8: Print Sacharissa's campaign contributions following her name. Each value sh...
  - 9: Print last names followed by a comma and the phone number. Be careful of t...
  - 10: Print the first and last names of those who contributed more than \$110 in the...
- 
- a. Insert above the first line the title - Great Literary Characters -. ✓
  - b. Remove the duplicate lines ✓
  - c. Print the contents of the file with only the last name then the phone number.. ✓
  - d. Append at the end of the file "Happily Ever after. The End". ✓
- 
- Citations 📖
  - Technical Support Contact Information 💬

## 1: Print all the First Names. ✓

ⓘ sed 's/Meg/Megan/g' SedLab

- sed is the command.
- s is short for the substitute command.
- g is short for global. The command will change all occurrences of the word you want to replace.
- SedLab is the file we are using.

```
[dave@localhost ~]$: sed 's/Meg/Megan/g' SedLab

```

Example of command line code

## 2: Print phone numbers for Tom and Frodo after their names. ✓

! wc -l SedLab

- The first thing we need to do is find out how many lines are in the file
- wc is short for word count.
- -l will list line count only.
- SedLab is the file we are using.
- Our word count is 27

i sed '24,27d' SedLab

- sed is the command.
- Since we know 27 is the last line, we will start at line 24 to delete the last 3 lines.
- d stands for delete
- SedLab is the file we are using.

```
[dave@localhost ~]$ sed '24,27d' SedLab
Huckleberry Finn:238-923-7366:95 Latham Lane, Easton, PA 83755:11/12/56:20300

[dave@localhost ~]$ sed 's/>.*/Westley Pirate*/As you wish./g' SedLab
```

Example of command line code

**8: Print Sacharissa's campaign contributions following her name. Each value should be printed with a leading dollar sign; e.g., \$250 \$100 \$175.**

i    sed '/Minerva McGonagall/s#[0-9][0-9]\*/[0-9][0-9]\*/[0-9][0-9]#[12/25/60#g'  
SedLab

- sed is the command.
- After Minerva McGonagall we want to substitute a birthday we don't know. So look for any number between 0-9.
- Changing it to date given keeping in mind date format mm/dd/yy.
- g is for global
- SedLab is the file we are using.

```
[dave@localhost ~]$ sed '/Minerva McGonagall/s#[0-9][0-9]*[0-9][0-9]*[0-9][0-9]#12/25/60#g' SedLab

[dave@localhost ~]$
```

Example of command line code

## 9: Print last names followed by a comma and the phone number. Be careful of the last names's format. ✓

 sed '/^\$/d' SedLab

- sed is the command.
- ^\$ means from beginning to end with nothing in between. This will delete any lines that go by that criteria.
- d is for delete.
- SedLab is the file we are using.

Blank lines were deleted before starting tutorial.

## 10: Print the first and last names of those who contributed more than \$110 in the last month. Make sure to include their last month contribution amount after the name ✓

### a. Insert above the first line the title - Great Literary Characters -. ✓

### vim scripta.sed

- vim is file editor that we will use to create the script.

 #!/bin/bash

#DB

1i\ - Great Literary Characters -

- Press 'i" to input text.
- Type #!/bin/bash to initialize the script to be used on command line.
- #DB is user's initials.
- 1i\ stands for insert on line 1.
- After the forward slash, enter what the title is.
- Press colon.
- wq! to save and exit the script file.

```
Arya Stark:438-910-7449:8235 Maple Street, Wilmington, OR 29085:9/23/63:68900
#!/bin/bash
#DB
```

```
1i\ - Great Literary Characters -
```

```
~  
~  
~
```

Example of command line code

### sed -f scripta.sed SedLab

- sed is the command.
- -f is the option for running the script file.
- scripta.sed is our script.
- SedLab is the file we are using.

```
"scripta.sed" 6L, 51C written
[dave@localhost ~]$ sed -f scripta.sed SedLab
- Great Literary Characters -

Example of command line code

c. Print the contents of the file with only the last name then the phone number..✓

 vim scriptc.sed

- vim is file editor that we will use to create the script.

 #!/bin/bash

#DB

\$!N;/^\\(.\*)\\n\\1\$/!P;D

- Press 'i" to input text.
- Type #/bin/bash to initialize the script to be used on command line.
- #DB is user's initials.
- Press colon.
- wq! to save and exit the script file.

#### d. Append at the end of the file "Happily Ever after. The End".

 vim scriptd.sed

- vim is file editor that we will use to create the script.

 #!/bin/bash

#DB

\$!N;/^\\(.\*)\\n\\1\$/!P;D

- Press 'i" to input text.
- Type #/bin/bash to initialize the script to be used on command line.
- #DB is user's initials.
- Press colon.
- wq! to save and exit the script file.
